

WEATHER AND WINE GRAPES IN THE NAPA VALLEY AVA

Paul W. Skinner, Ph.D., Terra Spase, Inc.

THE FIRST COMPREHENSIVE REPORT ON THE WEATHER OF THE NAPA VALLEY AND ITS INFLUENCE ON WINE GRAPE PRODUCTION (183 pages, 93 original color weather maps and images).

Sponsor: Napa Valley Vintners Association

Weather and Wine Grapes in the Napa Valley AVA provides a detailed description of the 14 different appellations and the weather that has occurred within the Napa Valley AVA from 1996 to 2002. Individual color maps of max and min temperature, precipitation, growing degree days, and disease risk are included for the entire Napa Valley AVA. Growing degree day maps for each appellation are also included.

Weather and Wine Grapes in the Napa Valley AVA combines weather data on the growing, harvest, and dormant season with information on grapevine growth and production for the many different wine grape varieties grown in the Napa Valley. Use this report to help:

- **Understand** vineyard site and varietal potential and vintage variations.
- **Adjust** vineyard production, irrigation, and pest management programs to achieve goals.
- **Evaluate** harvest scheduling plans and vineyard quality potential for wine grape pricing and purchasing agreements.
- **Market** wines produced from the unique terroirs of the Napa Valley AVA.

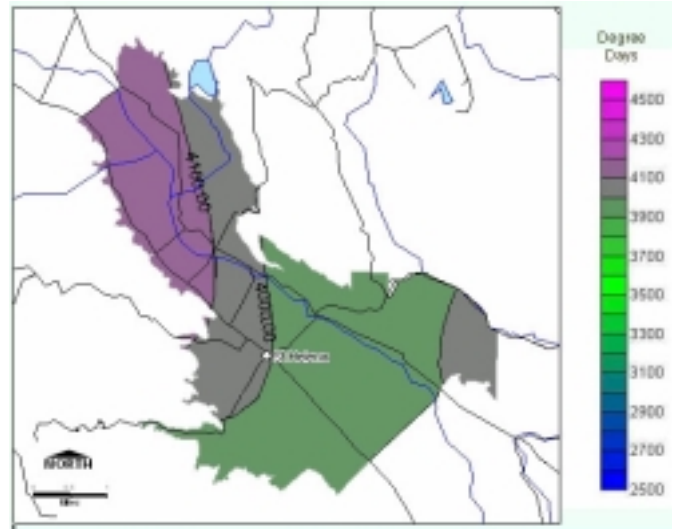

A VALUABLE RESOURCE FOR:
Winemakers, Vineyard Owners, Winery Owners,
Vineyard Managers, Winery General Managers,
Winery Marketing Staff, Wine Professionals
